PIZZA SALES ANALYSIS

Maximizing Pizza Sales with Analytics

Project owner : Devanshi Thakkar

Content

01 Background

This report provides an overview of pizza sales data from January 2015 to December 2015. Data was collected from various pizza joints across the United States and analyzed to uncover trends and patterns in pizza sales.

02 Problem Statement

The pizza restaurant has recently experienced a decline in sales and aims to boost them by examining customer and order data. Management plans to conduct a thorough analysis of order data and consumer behavior to identify key trends and areas for improvement.

Recommended Analysis : KPI's

1. The sum of the total price of all orders

```
--1. Total Revenue : The sum of the total price of all pizza order
select Round(SUM(total_price),2) AS Total_Revenue from pizza_sales;
```

110 %

Results | Messages

	Total_Revenue
1	817860.05

2. The average amount spend per order

```
--2. Average order Value: The average amount spent per order
select SUM(total_price) AS Total_Revenue, Count(DISTINCT order_id) AS Order_Count,
Round((SUM(total_price) / Count(DISTINCT order_id)),2) AS Average_order_value from pizza_sales
```

110 %

Results | Messages

	Total_Revenue	Order_Count	Average_order_value
1	817860.05083847	21350	38.31

Recommended Analysis : KPI’s

3. The sum of the quantities of all pizza sold.

```
--3. Total Pizza Sold : The sum of the quantities of all pizza sold
select SUM(quantity) Quantity_Sold from pizza_sales;
```

110 %

Results | Messages

	Quantity_Sold
1	49574

4. The total number of order placed.

```
--4. Total order : The total number of orders placed
select count(DISTINCT order_id) Total_order from pizza_sales
```

110 %

Results | Messages

	Total_order
1	21350

Recommended Analysis : KPI’s

5. The Average number of pizza sold per order

```
--5. Average_pizza per order : The average number of pizza sold per order,
--calculated by dividing the totalnoofpizzasold/totalnooforder
select Sum(quantity) AS Total_pizza_sold,
count(DISTINCT order_id) AS Total_order,
Round((SUM(quantity)/count(DISTINCT order_id)),2) AS Average_Pizza
from pizza_sales;
```
